Small hive beetle *Aethina tumida* is native to Africa but has
now spread to most continents. Defensive bees are attracted to
the breath, and a sting on the face can lead to much more pain
and swelling than a sting elsewhere, while a sting on a bare
hand can usually be quickly removed by fingernail scrape to
reduce the amount of venom injected.

Varroa destructor the Varroa mite, is an established pest of two species of honey bees.

Main article: List of diseases of the honey bee. For those who
are searching for less science and an enjoyable read this is
the book.
