Imagine a video conference where you not only feel like you're in the same room as the other attendees, you can actually feel one another's touch. With its anti-foundationalism and periodic implication that all knowledge systems are power-based, local, and equally valid, postmodernism fails to generate cumulative knowledge, carries the seeds of its own implosion, and sets a dangerous stage for intellectual sophistry.

The demonstration of widespread lack of replicability on studies in psychology Irigaray's claims about solid and fluid mechanics demand some comment. As a result of this analysis, we must conclude that science thus far has not and in principle cannot define reality, though no one would dispute the value of science as

demonstrated even in our everyday lives.

SignIn. Some postmodernists look to Thomas Kuhn and his idea of "paradigms"

Alvin Goldman, Goldman, and Philip Kitcher have treated the potential for premature, or otherwise improperly interested reporting of results to corrupt the sciences as a question to be answered by means of decision theoretic models.
