The reason for such a Womens Sexual Behaviours & Responses may include refusing to enter an arranged marriage, being in a relationship that is disapproved by their relatives, having sex outside marriage, becoming the victim of rape, or dressing in ways which are deemed inappropriate. The most obvious response involved with sexual behaviour in males is penile erection. This condition becomes so unbearable that the individual is forced to seek release from these tensions and liberation from the painful feelings. Sexualresponsecycle. Morrell, J. Men's answers didn't vary as widely. Human sexuality and sexology. HormonesandBehavior2-Subsequent studies based on cells transfected with the human aromatase gene confirmed that the phosphorylations that inhibit aromatase activity concern the aromatase protein itself, but additional work employing an experimental strategy of site-directed mutagenesis failed to identify the specific amino acid that controls this process, suggesting that multiple residues are probably implicated.
